DIECI

CONTINUOUS EVOLUTION

Constantly ahead in terms of technological solutions, Dieci continues the evolutionary process of its vehicles, raising the standards even higher with the **New Agriculture Range**.

Reliability, efficiency and comfort have reached unprecedented levels through improved design and instrumentation and the introduction of **patented, futuristic innovations**.

New **Stage V** engines on the whole range, **360° suspended cab** and **new interior, more intuitive and functional diagnostics and controls, new chassis** and **new transmissions**, bring tomorrow's agricultural telehandlers into the field today.

The **AGRI PLUS** top-level Agri machines range has been redesigned on a human scale: with the new futuristic cab signed by Giugiaro Design and important interventions on comfort and performance. We have provided farmers with a **top-quality telehandler**.

AGRI PLUS

NEW MODELS 42.7 | 40.10

PURE TECHNOLOGY

There has been a significant **technological evolution** in the Agri Plus family.

A **new boom** offers advanced functions and increased performance.

New **high-tech electronic control** with completely new display and telematics, Mini finger and VDC.

42.7 AGRI PLUS

- Maximum lifting: 7.2 m
- Capacity: 4.2 t

40.10 AGRI PLUS

- Maximum lifting: 9.7 m
- Capacity: 4 t

SUSPENDED CAB

EXCLUSIVE DIECI

ZERO SHOCK SYSTEM

Cab shock-absorbing system, unique in the telehandler sector, capable of effectively dampening the most annoying oscillations on the roughest terrain.

The hydraulic suspension of the cab effectively reduces oscillations and offers a high driving comfort through 4 supports that absorb impacts and jolts in every direction: lateral, vertical, rear and front.

Front Silent Blocks

Rear hydraulic shock absorbers

TOTAL COMFORT

MORE VALUE

- Cab by Giugiaro Design
- Refined soft-touch interiors, derived from the automotive industry

MORE LEGROOM

- Best-in-class ergonomics and accessibility
- More space for the operator's legs

MORE COMFORT

- Adjustable steering column and armrest
- Heated seat, 3 suspension system options
- Soundproofing roof, dashboard and mat
- Quick demisting of the windows

MORE VISIBILITY

- Large windows
- Integrated LED worklights - Headlights on the perimeter, on the boom and on the boom head
- Up to 3 wireless cameras

MORE SMART

- New display
 - Completely redesigned graphics
 - Integrated anti-tip indicator
 - Multilingual
 - Bonded display for perfect viewing from all angles
 - Instant-on
 - Automatic brightness
 - Full-screen rear camera
- Mini finger: rear sockets control
- VDC controller: browsing and parameters setting with a single control
- Thoroughly revamped telematics system with improved graphics

ROBUST RELIABILITY

- Reinforced High-Strength Steel boom with increased swinging force, extension cylinder with closing shock absorber
- Stronger, more robust and more stable chassis
- Double-cylinder, double-action hydraulic accessories lock for maximum stability
- Transverse levelling device as standard*

*40.10

SINGLE CONTROL

- **Boom movements and travel direction** are controlled uniquely by the **electronic joystick**, which integrates the **shuttle control (FNR)**, for fast, intuitive and comfortable control.
- All machine control functions are handled by a new **Electronic Control Unit** that monitors the best working parameters while optimizing boom movements.
- The **slowdowns on the movement end of stroke** improve operator comfort and extend component life.
- **Load Sensing - Flow Sharing hydraulic distributors**: these two technologies ensure more simultaneous movements and greater response to controls, for more effective and safe work.
- New safety features allow **maximum performance without risk**.
- **Continuous oil function** as standard.

VARIO SYSTEM TRANSMISSION

■ 4 Driving modes

- **Normal:** 0-40km/h without gear shifting by the operator, for maximum performance at all times
- **Eco:** 0-40km/h without gear shifting by the operator, for lower consumption and low noise emissions
- **Creeper:** engine rpm set independently of speed, for maximum accessory power even at slow travel speeds
- **Loader:** dedicated to heavy duty use at low speeds

■ **Integrated electronic control:** power, responsiveness and control in manoeuvres

■ **Wide speed range:** from 0 to 40 km/h with no need to change gear

■ **Cruise Control:** electronic accelerator and limiter

■ **Gear Lock:** shift lock in first gear, to handle challenging road routes

STAGE V: FAST, ACCURATE AND ECOLOGICAL

Always attentive to environmental issues, Dieci has made a great effort to update the engines of the New Agriculture Range to **Stage V** regulations, implementing the DOC and SCRoF systems and the DPF filter to limit atmospheric emissions.

All this without reducing **power, reliability and high performance**: this is the spirit of the new engine that drives all the models of the AGRI PLUS family. A cutting-edge engine with a fully electronic control, to optimize **power output and efficiency**.

HIGH PERFORMANCE

- A torque of 640 Nm at only 1500 rpm

ELECTRONIC EVOLUTION

- Complete electronic control: optimized output and efficiency

LONG AUTONOMY

- Top-of-range tank: 175 liters of fuel

MINIMUM EMISSIONS

- **Stage V** system
- DOC+SCRoF catalysts
- 35 liter Urea tank

ADVANCED TECHNOLOGY

HIGH TECH BOOM

- **Advanced functions:**
 - **Shake:** repeated tilting movements at the end of the stroke to facilitate detachment of residual material from the bottom of the bucket
 - **Wall:** load lifting along a vertical line with a single joystick movement to facilitate stacking
 - **Memory:** stored boom position, to reach it again with a single click

ENERGY SAVING SYSTEM

- Readiness and reactivity even when the vehicle is cold
- Precise and fast movements, even at high power

AUTOMATIC COUPLING SYSTEM

- Tools recognition without manual operations: easier, maximum safety
- Immediate vehicle setting for different uses

DTS

The **Dieci Telematic System** is the innovative telematic system that allows to interact with the vehicle remotely to geolocate it, monitor its operating parameters, measure its performance and limit its use.

By installing a high-tech control unit, the customer and the manufacturer can **connect to the vehicle in real time** from a computer or any mobile device and, through the **GSM and GPS networks**, discover where, if and how the machine is working, and **detect operating anomalies**, if any.

The operating data, collected via cloud, enable full **monitoring and diagnostics**. The support team and user can analyze the parameters directly, identify shortfalls in performance, and improve functionality or identify any maintenance operations required, thereby **optimizing costs** and ensuring **the vehicle and fleet are maintained in peak efficiency**.

The machine and its operators benefit from **active protection against theft and accident**: a notification is sent immediately if the vehicle leaves the predefined area. By setting a safe operating track, the operator is immediately alerted to any risk of impact or anomaly.

DIECI SERVICE

General headquarters in Emilia Romagna - over 135,000 square meters and about 400 people employed - and 3 branches in Germany, United Kingdom, France: Dieci is present in over 70 Countries with **an extensive network of over 400 dealers** and authorized service centers.

Dieci Service, our global technical assistance service, is developed on this basis: our customers are assisted directly by specialized technicians and every request is satisfied in a very short time. Dieci Service, **within a few hours, can provide interventions and spare parts all over the world.**
