

THD13-15N3 Series

MAN-DOWN VNA TRUCK

1.3 - 1.5 tonnes

VNA MASTERY... REACH TRUCK-LIKE AGILITY

Narrow aisles and high racking let you maximise your valuable warehouse space. With the THD13-15N3 Series you get an exceptional VNA truck with reach truck-like agility as well as many similar features - the perfect combination to make the most of your optimised layout.

WHEN
RELIABILITY IS
EVERYTHING...

THD13-15N3 Series MAN-DOWN VNA TRUCK

1.3 – 1.5 tonnes

Its market-leading performance – with top speeds of up to 14 km/h – combined with ergonomic design and comprehensive safety features make for high productivity through incredibly efficient, safe operation.

When outside of aisles, VNA trucks can often be less efficient and manoeuvrable. This usually means P&D stations and feeder trucks are needed so the VNA trucks can remain in the aisles. The cycle times of VNA trucks and feeder trucks rarely sync up, which means time wasted while one is sat idle.

By combining the best of man-down VNA and reach truck capability in a single truck, operators can fetch their own pallets without having to rely on extra staff and head straight into the very narrow aisles. With trucks that do both, you can optimise your space and optimise your operations: lower costs by streamlining the number of trucks and personnel, and increase capacity by not having P&D stations.

BRAKES

- **End of aisle braking system (option)**
The truck automatically slows as it reaches the end of an aisle for greater safety.

DRIVE

- **Automatic Speed Reduction**
When the truck is outside of stacking aisles, drive speed is automatically limited when forks are above a certain height.
- **Durable drive wheel**
Low-wear drive wheel means less maintenance and lower costs.
- **Active Spin Reduction (option)**
Helps to stop the drive wheel spinning. This minimises grip loss while also reducing wear on the wheel.

ELECTRICAL AND CONTROL SYSTEMS

- **On-board diagnostics and fault memory folder**
Speed up servicing and help prevent damage.

FORKS AND MAST

- **Level Assistance System (option)**
Automatically detects the operator's intention and stops when the forks are at precisely the right level.

FRAME AND BODY

- **Robust chassis**
Built for intensive operations, with great inherent strength and high residual capacities.
- **Modular design**
Limits the number of parts used meaning service engineers can carry fewer parts to keep the first-time fix rate incredibly high.

OPERATOR COMPARTMENT AND CONTROLS

- **Easy-access compartment**
Features like ergonomic hand bars, low non-slip step and a wide entry provide safe and effortless entry and exit.
- **Multifunctional Ergologic Joystick**
This intuitive and highly ergonomic joystick controls up to seven different functions, including lifting, lowering, fork rotation, fork traversal, and direction control (optional)
- **Electrically adjustable floor height**
Can be adjusted to suit each operator to provide a more ergonomic seating position.
- **Spacious and comfortable cabin, clear view and fast, accurate fork positioning**
This all helps to increase productivity and reduce risks of driver fatigue - even on the longest shifts.
- **Tilting seat with ergonomic backrest**
Drivers are kept safe, comfortable, and alert through long shifts.

THD13-15N3 Series MAN-DOWN VNA TRUCK

1.3 – 1.5 tonnes

- **Automotive-style pedals**
Pedals are placed in a familiar position for intuitive operation.
- **Hands-free direction controls**
Directional controls in the accelerator means the control workload can be distributed between hands and feet.
- **Hand-operated direction control (option)**
Suitable for environments where pedal direction control would be difficult, or for operators who prefer to control direction with their hands.
- **Mast mirrors**
Adjustable curved mirrors give the operator an excellent view of the truck, load, or fork tips from their normal driving position while at ground level.
- **PIN-code access**
Stops unauthorised truck use and keeps you aware of who's operating at all times.
- **Transparent overhead guard (option)**
Improves safety by offering an unobstructed view of forks and load
- **Fingertip hydraulic controls (option)**
Integrated, fully adjustable, and allows effortless precision.
- **Position light (option)**
Aligning the red laser with rack marking allows the driver to quickly ensure the forks are central to the desired position.

STEERING SYSTEM

- **Mini steering wheel with floating armrest**
Ergonomically adjustable to reduce strain and lower risk of RSI.
- **360-degree steering (option)**
Selectable via personal PIN code. The operator can keep the truck in constant motion - saving seconds on every turn.
- **Midi steering wheel (option)**
Adjustable positioning with tilt function.

WHEN RELIABILITY IS EVERYTHING...

Like any product bearing the "MITSUBISHI" name our materials handling equipment benefits from the tremendous heritage, huge resources and cutting-edge technology of one of the world's largest corporations – Mitsubishi Heavy Industries Group.

Engineering spacecraft, jet planes, power plants and more, MHI specialises in those technologies where performance, dependability and superiority decide your success or failure...

So when we promise you quality, reliability and value for money, you know it's a guarantee we have the power to deliver.

That's why every model in our award-winning and comprehensive range of lift trucks and warehouse equipment is built to a high specification – to ensure it keeps working for you. Day after day. Year after year. Whatever the job. Whatever the conditions.

YOU'LL NEVER WORK ALONE

As your local authorised dealer, we are here to keep your trucks working – through our extensive experience, our technical excellence and our commitment to customer care.

We are your local experts, backed by efficient channels to the entire organisation of Mitsubishi Forklift Trucks.

No matter where you are, we are close by – with the capability to meet your needs.

Discover how Mitsubishi Forklift Trucks give you more from your local authorised dealer or when you visit our website www.mitforklift.com

Performance specifications may vary depending on standard manufacturing tolerances, vehicle condition, types of tyres, floor or surface conditions, applications or operating environment. Trucks may be shown with non-standard options. Specific performance requirements and locally available configurations should be discussed with your distributor of Mitsubishi forklift trucks. We follow a policy of continual product improvement. For this reason, some materials, options and specifications could change without notice.
