

FLOAT VALVES

New and unique float valves suitable for all batteries

- One size fits all: adjustable float heights
- Instant tubing installation: unique push-fit tubing ports make tubing installation fast, easy and secure
- Lowest profile on the market: 15 mm high
- Wide range of operating pressure: from 3 to 45 psi
- Abuse-resistant tubing: with a small bend radius it fits even the smallest cells easily
- Highly visible fill level indicator: visible from the top and side
- No barbed fittings to break

COMPLETE KIT REFERENCES

Part Numbers	Description	Technical Information	Reference
FLT-KE6A	Float Kit 12 V	Float valve kit for 6 cell DIN battery	REF 137TA1862
FLT-KE9A	Float Kit 18 V	Float valve kit for 9 cell DIN battery	REF 137TA1863
FLT-KE12A	Float Kit 24 V	Float valve kit for 12 cell DIN battery	REF 136TA3178
FLT-KE18A	Float Kit 36 V	Float valve kit for 18 cell DIN battery	REF 137TA1864
FLT-KE20A	Float Kit 40 V	Float valve kit for 20 cell DIN battery	REF 137TA1865
FLT-KE24A	Float Kit 48 V	Float valve kit for 24 cell DIN battery	REF 136TA3179
FLT-KE36A	Float Kit 72 V	Float valve kit for 36 cell DIN battery	REF 137TA1866
FLT-KE40A	Float Kit 80 V	Float valve kit for 40 cell DIN battery	REF 136TA3180
FLT-KE48A	Float Kit 96 V	Float valve kit for 48 cell DIN battery	REF 137TA1867

The above float kits include floats, tubing, input coupling and filter assembly, cable ties and instructions for installation and operating.
